EXPERIENCE, RESEARCH & LEADERSHIP

Sardis Capital London, UK / Remote
Research Intern Jun 2026–Present

- Analyse the semiconductor sector using company filings and industry data, producing research on value chains, competitive positioning and emerging technologies.
- Designed and deployed an internal research platform to streamline data collection, verification and review across investment-research workflows.

LSE Economics Undergraduate Research Programme London, UK
Economics Researcher – Modelling Procrastination Feb 2026–Present

- Review academic literature and develop economic models of procrastination and intertemporal decision-making.

Columbia University, School of International and Public Affairs New York, US
Research Assistant to Dr Anya Schiffrin Feb 2025–May 2025

- Reviewed graduate paper drafts for a series of classes on misinformation and disinformation, providing tailored feedback on evidence and argument.
- Contributed media-policy research and quantitative analysis to the OSCE research report *Exploring for News in the Platform Economy*; also supported research on university finance.

St Mary's Ukrainian School London, UK
Volunteer Mathematics Tutor Sep 2024–Feb 2025

- Tutored Ukrainian refugee pupils in mathematics.

Mosaic Ventures London, UK
Work Experience Placement Jan 2023

- Analysed AI and machine-learning markets and startup-sourcing data to support early-stage technology screening and investment evaluation.

SELECTED PROJECTS

Reclaiming citizen voice: whose consultation is it anyway? LSE
LSE100 Team Research Project 2025–2026

- Co-authored and presented a six-person study selected from 150+ submissions for Knowledge Beyond Boundaries 2026, LSE's interdisciplinary student research conference.

A Recommender System for Questions in Mathematics (RSQM) St Paul's School
Computer Science A-level project 2023–2024

- Built a full-stack adaptive maths-practice platform with Python, Flask, PostgreSQL and JavaScript, automating PDF transcription with Claude 3 Opus vision and generating OpenAI text embeddings.
- Implemented a hybrid recommender combining cosine-similarity retrieval, feedback-driven user-vector updates and adaptive epsilon-greedy exploration; validated it through automated checks, Monte Carlo simulation, end-to-end workflows and user testing and documented it in a 62-page technical report.
